

Patient Consent for AI Scribe at the Sundridge & District Medical Centre

Our healthcare team has a new tool to help us take notes during your visit. With your permission, we record the appointment, and the computer program called an AI (artificial intelligence) scribe helps us write down what we talk about and what happens during your appointment. This allows us to pay more attention to you and give you better care.

We need your permission to use the AI scribe and record the conversation. Your information will be kept safe, and the AI scribe is only used to help improve your healthcare:

- The AI scribe follows all healthcare privacy laws for the province of Ontario.
- The AI scribe supports but does not replace your clinician's professional judgment. All medical decisions are made solely by your healthcare provider.

By signing this consent form, you acknowledge that:

1. You have been informed about the use of the AI scribe and its purpose.
2. You agree to allow your clinician to use the AI scribe to assist with documenting your appointment today and going forward.
3. You understand that you can withdraw your consent at any time without affecting the quality of care you receive.

Name (PRINT): _____

Date: _____

Signature of patient or guardian: _____
